

AMENDMENTS TO THE CLAIMS

The following listing of claims will replace all prior versions, and listing of claims in the application:

LISTING OF CLAIMS:

1. (Currently Amended) An elastic buckle designed for ~~a the~~ T-shaped bolt having the horizontal part and the vertical part, comprising:

~~an~~ An external clip part means being a vertically directed wide-faced clip ~~[[,]]~~ and having there-forms a flange formed on one side of ~~a the~~ top of said external clip part, ~~a the~~ thickness of said the top of said the external clip part being is larger and gradually becoming ~~becomes~~ thinner toward ~~forward~~ ~~a the~~ bottom thereof;

~~an~~ An internal clip part means being a vertically directed wide-faced clip with a lower height than a height of said the external clip part, said internal clip part having there is a slant inside ~~a the~~ top thereof and a plugging door centered on ~~a the~~ bottom of said internal clip part, said internal clip part having there have a socket sockets on each of two ~~both~~ sides of said the plugging door and thus to thereby form ~~a the~~ first plug on one side and ~~a the~~ second plug on an opposing both side sides of each of said sockets, the socket, the relative positions of the bottoms of the said first plug and said the second plug of each socket

respectively having a bottom portion with a protrusion formed thereon have
protrusions; and

a ~~A~~ connecting part being is horizontally directed horizontal and
integrally formed integral with said the bottom of said the external clip part and
said the bottom of said the internal clip part ; [[.]]

whereby a head ~~By the aid of the above components, to build the~~
~~horizontal part of the T-shaped bolt is first received in said into the socket of the~~
~~elastic buckle, and the vertical part across the plugging door, then said elastic~~
~~buckle is make the user manipulate the elastic buckle in movement manipulated to~~
receive the head of the T-shaped bolt in said sockets ~~to fasten tightly and depart~~
~~loosely for the fastener and the grip rod of the portable case.~~

2. (Currently Amended) An elastic buckle as claimed in Claim 1, wherein ~~the~~
~~outer face of~~ said the external clip part has is an outer face having a concave
surface.
